Kebab Machine

- **Effortless Mince Kebab Preparation:** Craft Adana and Urfa kebabs without the need for manual contact.
- **Food-Safe Design:** Entirely produced from materials suitable for food contact, ensuring hygiene and safety.
- **Eliminates Hand Touch:** Say goodbye to the traditional method of manually skewering kebabs, reducing the risk of contamination.
- **Hygienic Alternative:** Designed to prevent the unsanitary practice of immersing hands in water to prevent sticking and adjust consistency.
- **Time and Labor Savings:** Especially beneficial for high-volume commercial stores, offering efficiency in kebab preparation.
- **Convenient Solution:** Streamlines the kebab-making process, providing a practical and hygienic alternative for businesses.

OVERVIEW

- Simple one-switch operation with an automatic closing mechanism using magnetic sensors.
- Polyethylene piston presses minced meat mix into a kebab-shaped cylinder.
- Counter tracks the number of skewered kebabs.
- Heater prevents mold sticking, operating at an average temperature of 60 degrees.
- CE compliant electrical components; PLC-controlled system with domestic equipment and parts.

BENEFITS

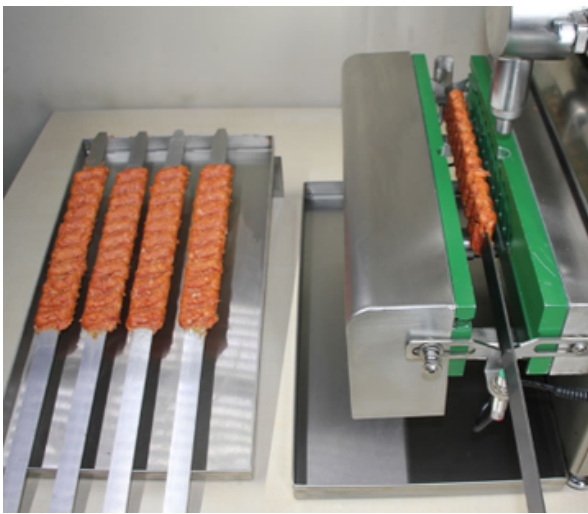

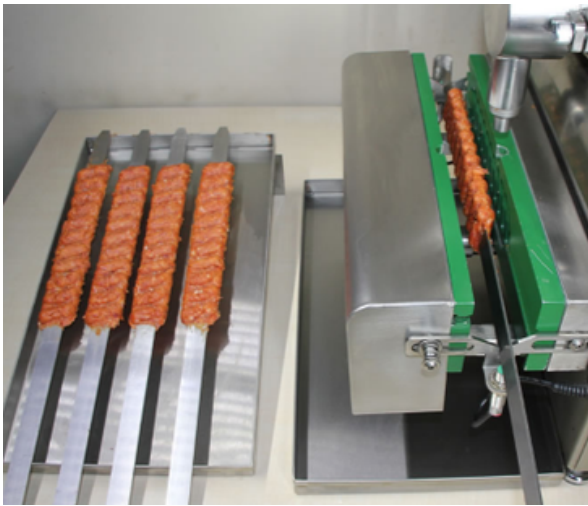

- **Quick Delivery:** Your machine arrives at your doorstep hassle-free.
- **Easy Setup:** Our experts ensure your machine is ready for production without any complications.
- **Personalized Training:** Gain confidence in operating your machine through tailored training sessions.
- **Proven Recipes:** Access a range of tested recipes for top-notch product quality and efficient manufacturing.
- **Continuous Support:** Our dedicated technical team is always ready to assist, ensuring your machine operates smoothly.
- **Fast Parts Delivery:** Get machine parts delivered promptly for uninterrupted production.

TECHNICAL SPECIFICATIONS

- Requires 220 V electricity for operation.
- Meat Press Capacity: 30-200
- Body crafted from 304-quality stainless steel.

PRODUCT APPLICATIONS

Kebab | كباب
